

A smart port connecting smart people

Live Port Course
JNPA-APEC

PORT AND MARINE SERVICES

24/06 – 28/06 2024

Port of
Antwerp
Bruges
International

WHY

A port environment is a catalyst for sustainable growth, not only for the respective port platform but also for the wider regional/national economy, adding to the wealth and wellbeing of the region/country it serves.

Obviously, the maritime services and operational activities carried out by the port community are crucial for the efficient and safe operation of this important link in the supply chain.

This course will interactively teach you the ins and outs of operational and maritime services, provided in a port to remain competitive in an ever-changing maritime environment.

FOR WHOM

This programme is directed towards the technical staff within a port authority / company, nautical profiles, marine engineers and port employees who are involved in operational matters within a port on a daily basis.

WHAT

This training programme covers all the important aspects of Port and Marine Services, such as:

- Regulations: IMO, SOLAS, VTS, etc.
- Nautical chain: chain management, legal aspects, traffic control, etc.
- Port services: the process of arrival, mooring and unmooring, pilotage, towage
- Environmental services: air emissions, emissions to the general surroundings
- Bunkering and oil spill response: regulatory framework, market and evolutions, oil spill response
- Maritime Business Development: containers, dry bulk and wet bulk – liquid cargo

It will also be supported by physical and online interactions from Indian lectures / companies, who are active in the private sector'

Course fee: Rs 100 000

The course fee covers educational material, airport pick-up / drop off, accommodation (5 nights in a twin sharing room) and all meals and beverages (no GST included)

* A single room can be provided at an additional cost of Rs 20 000 and is subject to availability
