

A smart port connecting smart people

Live Port Course

**HEALTH, SAFETY,
SECURITY AND
QUALITY**

16/12/2024 - 20/12/2024

**Port of
Antwerp
Bruges**
International

WHY

Health, Safety, Security and Quality (HSSQ) standards are critical in the port industry to ensure operational continuity and the safety of employees & visitors. Working in ports involves unique hazards, from heavy machinery to high-risk cargo handling.

A strong HSSQ program is essential to address these challenges and safeguard workers' health and security. This course equips participants with the tools and insights to implement effective risk management and high HSSQ standards.

FOR WHOM

Designed for all professionals directly or indirectly involved in HSSQ within the port sector, this course is suited for staff and managers in port authorities, logistics companies and other public and private entities connected to port operations.

WHAT

This 5-day course provides a comprehensive overview of Health, Safety, Security and Quality (HSSQ) principles tailored to port operations. It combines theoretical knowledge with practical exercises and interactive workshops. It consists of lectures by Indian/Belgian private companies and complemented by international best practices.

HOW

All modules are composed of theoretical concepts used worldwide and supported by practical insights from the Indian industry.

The three modules covered in the course:

1 Health and Safety

- Essentials of maritime health and safety practices
- Introduction to ISO 45001 and its application in port environments

2 Security

- Introduction to the ISPS-code
- Key aspects of cybersecurity in port environments

3 Quality

- Quality management systems
- Compliance and audits
